EXPERIENCE

Deal App Frontend Engineer
May 2023 | Present · 10 months

➔ Implemented highly interactive pixel-perfect user interfaces according to figma designs

➔ Refactored 3 yrs old code without damaging the bussiness needs to improve readability , reusability and overall performance

➔ Wrote high-quality code that works cross-platform using ionic

➔ Created custom validators for all the user inputs in the app

➔ Improved the team's code reviews workflow by 20% through automation

➔ Solved critical bugs in sensitive areas like publishing ads and requests

➔ Helped new engineers with the onboarding process explaining the business logic

➔ Handled the state management for the ad flow module

➔ Implemented new features from scratch (track requests, request statistics, etc)

➔ Contributed to the development and maintainance of highly complex dashboards

➔ Added lazy-loaded feature of ad card images and crafted an animated skeleton loaders

➔ Crafted animations for the tabs of the app

➔ Innovated video-hovering functionality, mirroring YouTube's style, to elevate user engagement and platform experience

➔ Provided frontend static templates for backend team to help them in publishing PDFs and images on the server for clients

Upwork Freelance SW Engineer
January 2023 | May 2023 · 4 months

➔ Developed and maintained websites ensuring seamless integration with back-end RESTful APIs and sockets

➔ Improved responsive design techniques for a content-heavy website

➔ Delievered working software for clients on specified deadlines

PROJECTS

Fitscape Application

- ➜ This is undoubtedly the most beautiful thing i've built so far and the kind of project that i'm presenting to the interviewer first thing
- ➜ it's basically a full stack fitness app that tracks your workout in the gym and evalutes your volume with a fully functional dashboard

Learnology Application

- ➜ An educational app with a lot of features, i've put so much effort on this one.
- ➜ You can message another people real-time
- ➜ You can fully controll the app through the admin dashboard

Homeland Application

- ➜ A real estate web app where you can search for the houses and apartments to purchase
- ➜ You can filter the location , price range , and also type of the estate

FantastK Ecommerce Brand

- ➜ An Ecommerce web app where you can browse latest and trendy products
- ➜ You can filter the products however you want with price and category
- ➜ You can also Add to cart , Login , Logout , and Signup

NETFLIX CLONE

- ➜ A very similar clone to the original famous , well-known one
- ➜ You can Signin , signup and watch trailer of the selected show category
- ➜ you can also add the show or movie to favourites

Fitness Website

- ➜ great commercial website provided from a company which interested in offering services to the gym community
- ➜ highly effective user interface to make the client want to buy a subscription

Technology website

- ➜ modern-looking website with today's standards which provides execellent user journey
- ➜ smooth browsing with good layout and great hero section
